

Mastering 2FA & Password Management

TOPIC: DIGITAL PROTECTION | CLASSIFICATION: PUBLIC DEFENSE GUIDE

The definitive guide to eliminating credential stuffing: password managers, hardware security keys, and modern passkeys.

Key Defensive Principles & Takeaways:

- 1** **Never Reuse Passwords**
When one small forum is breached, attackers test that exact email/password pair on 5,000 top websites within hours.
- 2** **Ditch SMS Verification for Authenticator Apps**
SIM-swapping attacks render SMS codes vulnerable. Use TOTP apps (Bitwarden, Aegis) or FIDO2 keys.
- 3** **Emergency Access & Recovery Kits**
Store laminated recovery master keys in a fireproof safe or safety deposit box.
- 4** **Passkeys Demystified**
Public-key cryptography built into your device hardware that is cryptographically immune to phishing websites.
